

Jordan Gregory-Wallis

Senior Software Engineer

Located in Australia | Working Holiday Visa Holder | Full working rights

+61 452 622 596 | j.gregorywallis@gmail.com | jordangwallis.dev

SUMMARY

Senior Software Engineer with 10+ years' experience building and modernising web-based C#/.NET applications, with a strong track record refactoring and modernising large legacy monolith systems, including full .NET Framework to .NET Core rewrites and large-scale Entity Framework migrations. Experienced across the GitHub ecosystem, including Git, GitHub Actions and CI/CD workflows, primarily within the insurance industry.

Focused on delivering reliable, well-tested software within Agile teams, working closely with Product Owners, testers and stakeholders. Comfortable adopting AI-assisted development workflows where they meaningfully improve delivery speed and quality.

EXPERIENCE

Professional Development & Portfolio

June 2026 - Present

- Deepening expertise in distributed systems, API design, and legacy modernisation through structured study and working on personal projects
- Available for 3-6 month .NET contract roles across Australia

Career Break - Travel & Relocation

Dec 2025 - May 2026

- Career break spent travelling across South East Asia before relocating to Australia on a Working Holiday Visa

Ignite (a Verisk business) | Manchester, United Kingdom | Hybrid

Mid - Senior - Lead Software Engineer - Sep 2019 - Nov 2025

- Led development and technical direction across multiple insurance platforms built on C#/.NET and SQL Server
- Contributed to removal of 500k+ lines of legacy code as part of a wider simplification and modernisation initiative
- Single-handedly rewrote a business-critical internal configuration application, used by all site stakeholders, from .NET Framework 4.6.2 (WebForms, Entity Framework) to .NET 9, writing tests upfront to verify existing behaviour was preserved through the migration
- Built the application's CI/CD pipelines in GitHub Actions, with guidance from a senior DevOps engineer, enabling automated build, test and deployment for the rewritten application

- Used the rewrite to remove unused legacy features and ship a long-requested new feature at release, delivering the full migration in around six weeks alongside core responsibilities, with GitHub Copilot and Claude Code used to accelerate the refactor
- Contributed to the planning and execution of a large-scale Entity Framework 6 to EF Core migration on a business-critical legacy monolith, rewriting hundreds to thousands of model files and updating surrounding infrastructure logic as part of a cross-department engineering effort
- Helped manage regression risk on this high-risk migration through a combined strategy of unit, manual and automated testing, ensuring a safe, correct cutover across the full application

Club Systems International Ltd | Manchester, United Kingdom | On-site

Software Engineer - Sep 2018 - Sep 2019

- Built fully tested software using ASP.NET MVC

Lightening e-com Ltd | Manchester, United Kingdom | Freelance

Freelance Software Engineer - Nov 2018 - May 2019

- Undertook a freelance software engineering role alongside full-time work

Ignite (a Verisk business) | Manchester, United Kingdom | On-site

Junior QA Engineer - Mid level Software Engineer - Jul 2014 - Aug 2018

- QA Engineer apprentice progressing into software development

TECHNICAL SKILLS

Languages & Frameworks:

C#, .NET/.NET Core, ASP.NET (MVC, Web API, WebForms), Entity Framework, SQL, TypeScript, Vue.js, JavaScript, HTML, CSS, SASS

Databases & Infrastructure:

SQL Server, Redis, Azure, GitHub Actions, Docker, Kubernetes

Testing & Quality:

NUnit, Moq, FluentAssertions, Cypress, Playwright, Automated testing, TDD

Logging and Monitoring:

Serilog, Application Insights, Azure Monitor, Grafana, Loki

Tooling & Collaboration:

Git, GitHub, Azure DevOps, Jira, Linear, Miro, Lucidchart

EDUCATION

Loreto Sixth Form College

Manchester, United Kingdom | 2012 - 2014

- A Levels: Business Studies and Media Studies

INTERESTS

Motorcycles & Mechanics | Running & Gym | Reading & Study | Travel & Exploration
